CLIENT FOCUSED INNOVATION

We offer a comprehensive range of services across multiple sectors. We work with both public and private sector clients, tailoring our approach to meet each project's unique demands.

At Align, our focus is simple: our clients. We listen, plan, and deliver with care — aligning our work with your aspirations, budget, and timeline to build lasting relationships. We pride ourselves on delivering buildings of the highest quality and value.

Guided by principles of honesty, integrity, and professionalism, we provide innovative, creative solutions rooted in best practice. We aim to design buildings that enhance their environment while minimizing their impact on natural resources.

DELIVER

DESIGN DRIVEN SOLUTIONS

We deliver design-led solutions that bring quality and inspiration to every project, no matter the size or complexity.

Our goal is to keep our clients and their aspirations at the center of everything we do.

We believe in forming strong, collaborative partnerships with all members of the project team to achieve the best outcomes. Our strength lies in listening closely and transforming each client's unique needs into high-quality architectural solutions—on time, every time.

Every project is a collaboration. Come prepared: we aim to foster inspiring relationships that help identify and overcome challenges before they become roadblocks.

When the project is complete, we want all involved to admire a high-quality, creatively designed building, shaped with people, place, and purpose in mind.

We follow principles of honesty, integrity, and professionalism while striving for innovative, sustainable design. Every project we undertake is an opportunity to enhance its environment and reduce its impact on natural resources.

VISIONS

REALISED

SERVICES

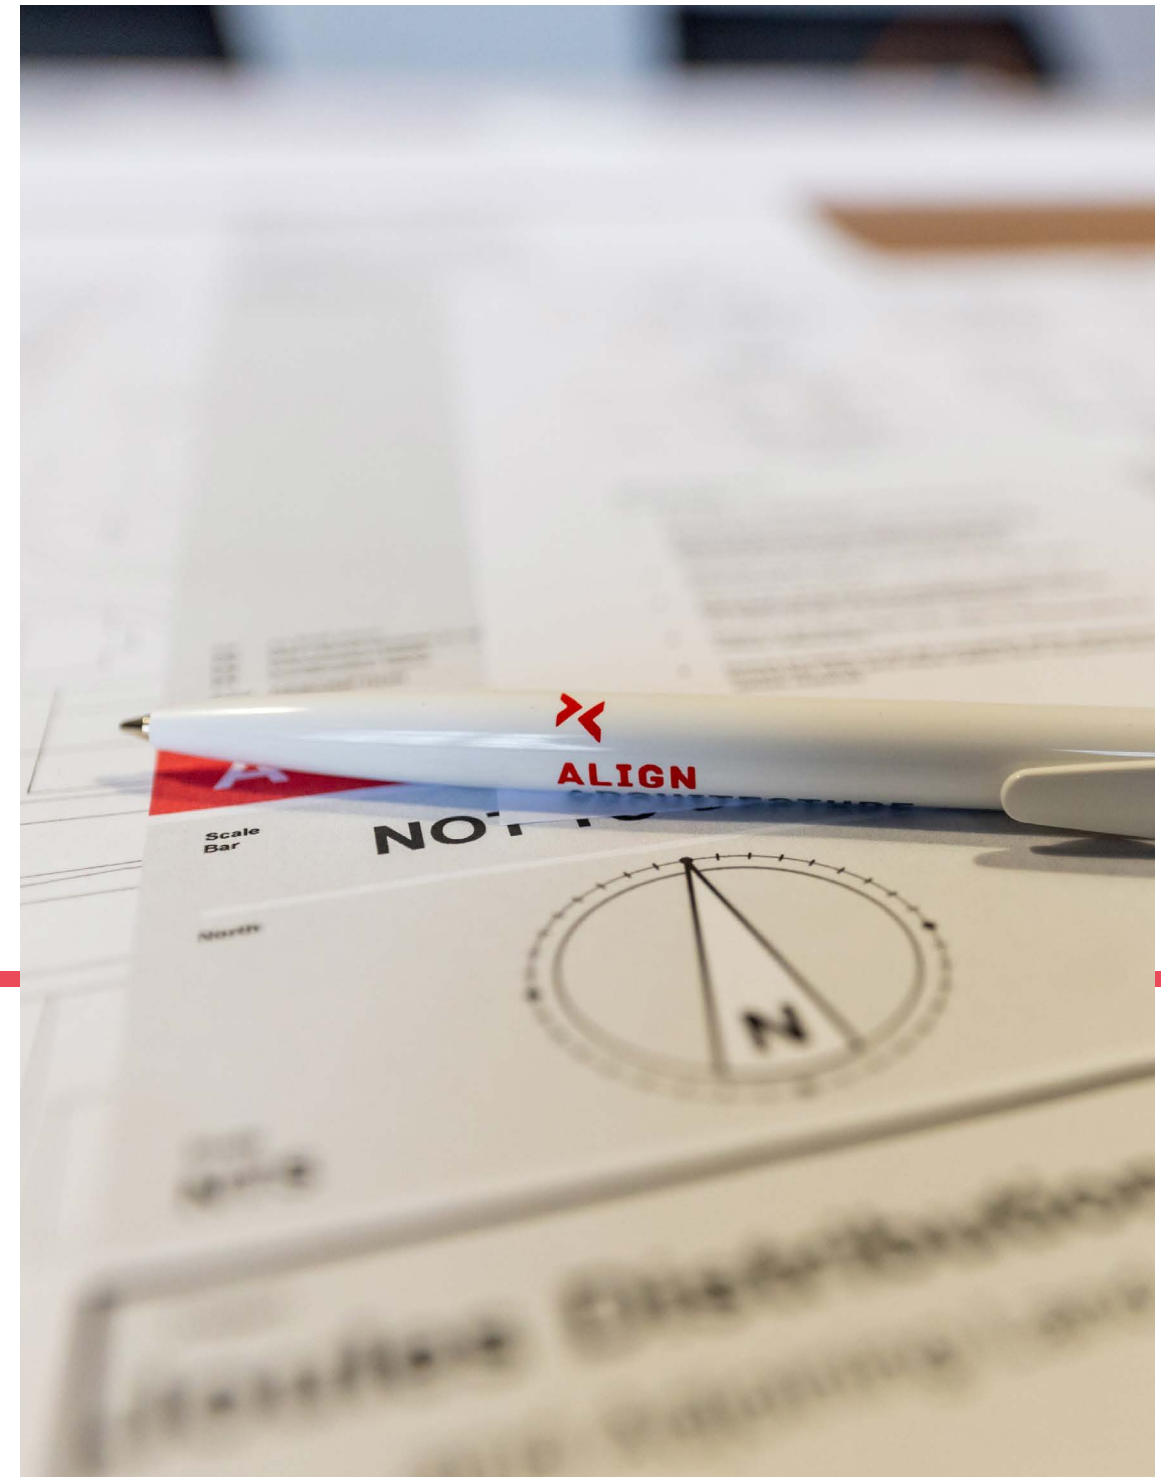

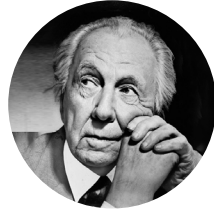

MASTERPLANNING

THE MASTER PLAN

We excel in all aspects of masterplanning and urban design. Using a mix of 3D visuals, high-quality sketches, and physical models, we bring your vision to life.

From defining the project to managing its execution, our goal is to help create better places to live and work.

The good building is not one that hurts the landscape, but one which makes the landscape more beautiful than it was before the building was built.

Frank Lloyd Wright

American architecture, designer, writer and educator

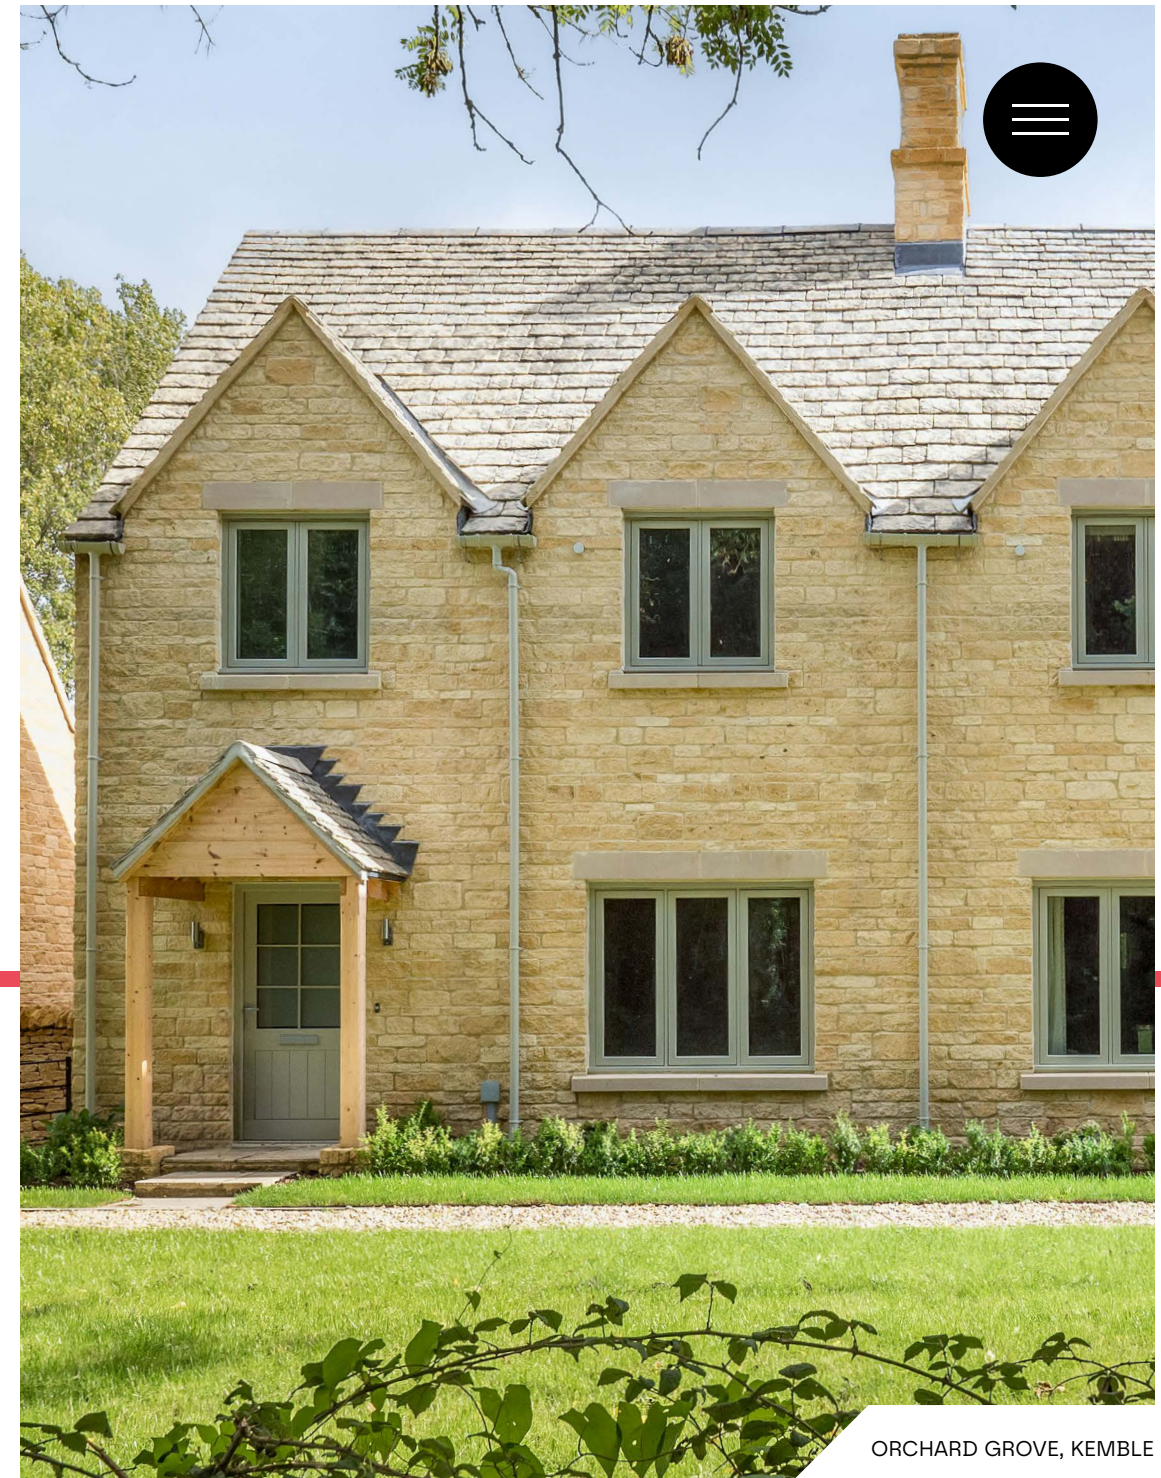

FEASIBILITY STUDIES

CONCEPT TO REALITY

We tailor every feasibility study to your project's specific needs — from simple site assessments to complex usage reviews.

Our clear, informative documents help guide your next steps, turning concepts into actionable projects.

ORCHARD GROVE, KEMBLE

No design is possible until the materials with which you design are completely understood.

Ludwig Mies van der Rohe

German and American architect, academic and interior designer

SUSTAINABILITY

SUSTAINABLE BY DESIGN

Our innovation extends beyond aesthetics. We're experienced in designing energy-efficient, low-carbon buildings using sustainable materials and practices.

Whether you're starting from scratch or improving an existing property, we can help you meet your sustainability goals while reducing long-term costs.

CONSULTATION

CONSULT & ENGAGE

Our design process begins with a detailed site study, identifying both opportunities and challenges. We encourage client involvement and community engagement to ensure outcomes that benefit everyone.

We bring expertise in public consultation, high-quality visuals, and clear communication. Whether reviewing a tricky design or advising on a new acquisition, we're happy to provide insights and direction. We love talking architecture.

3D VISUALISATION

VISIONS REALISED

We bring your ideas to life through high-quality architectural visualisations. Whether through detailed 3D renderings or artistic hand drawings, our visuals reflect both your ambition and our expertise.

Our team is open, approachable, and efficient—always aligning creative processes with your budget and timeline.

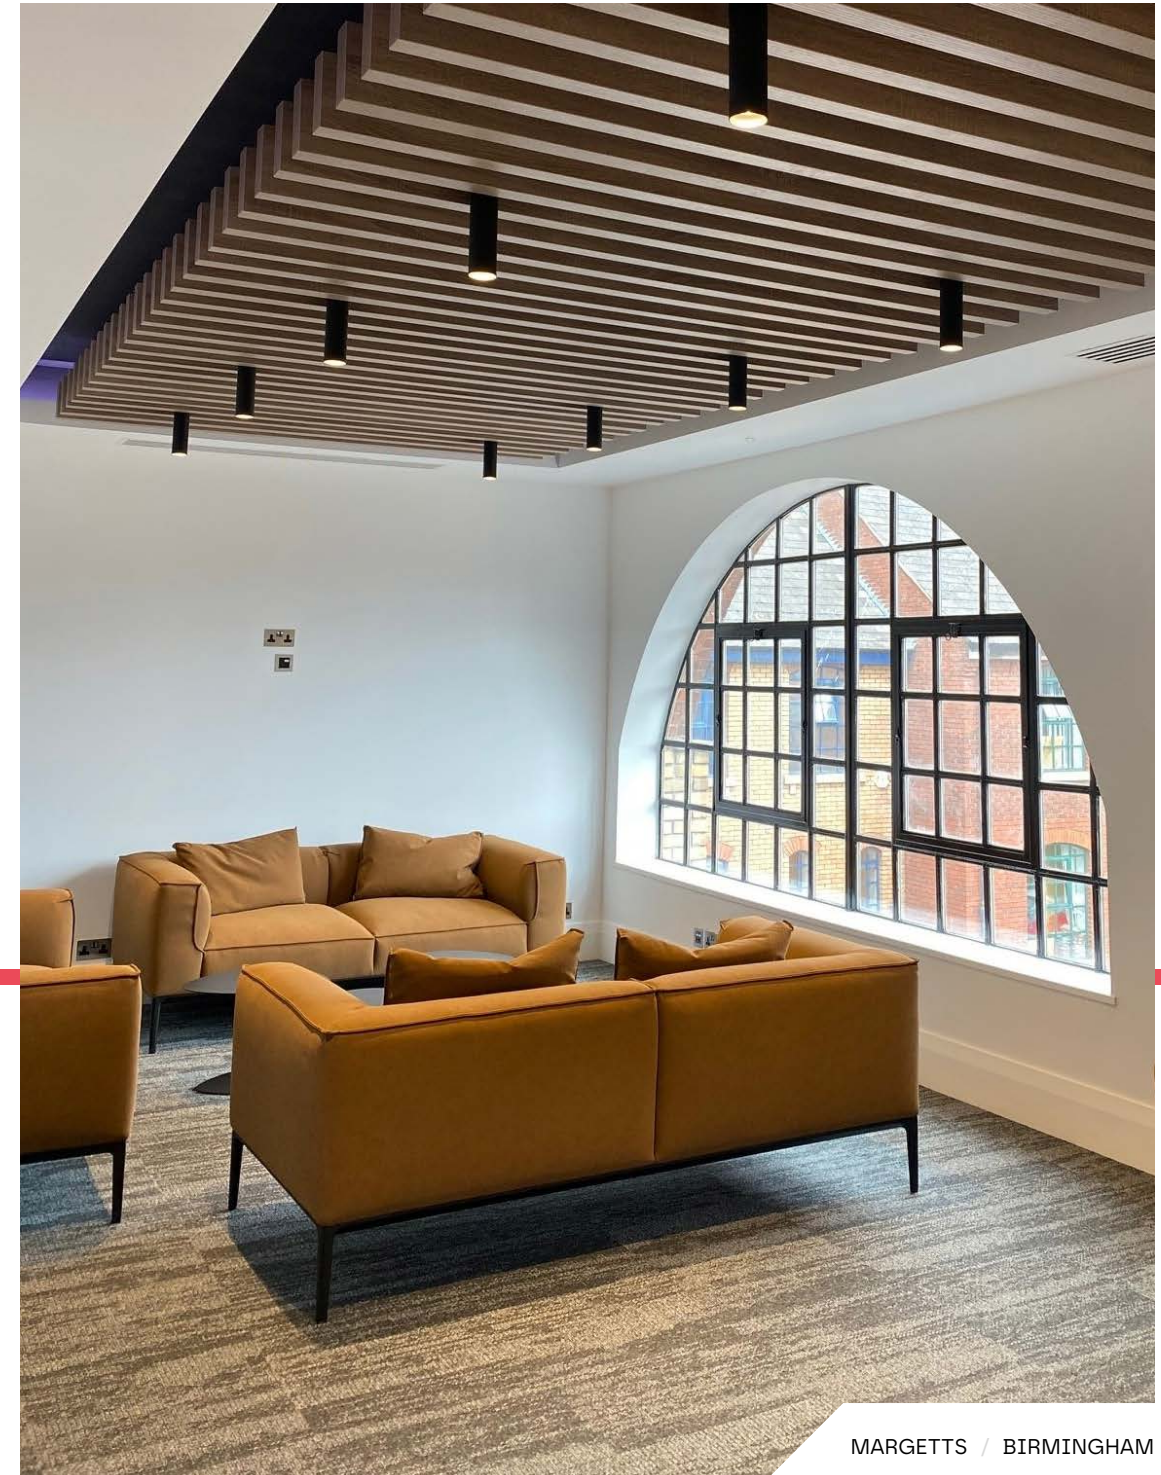

ARCHITECTURE

DESIGN IS WHAT WE DO

Architecture is at the core of Align. We combine structural integrity with artistic expression to create spaces that are functional, sustainable, and emotionally resonant.

We balance form and function, harnessing technology and digital tools to enhance design. The result? Buildings that perform well, feel good, and make a lasting impression.

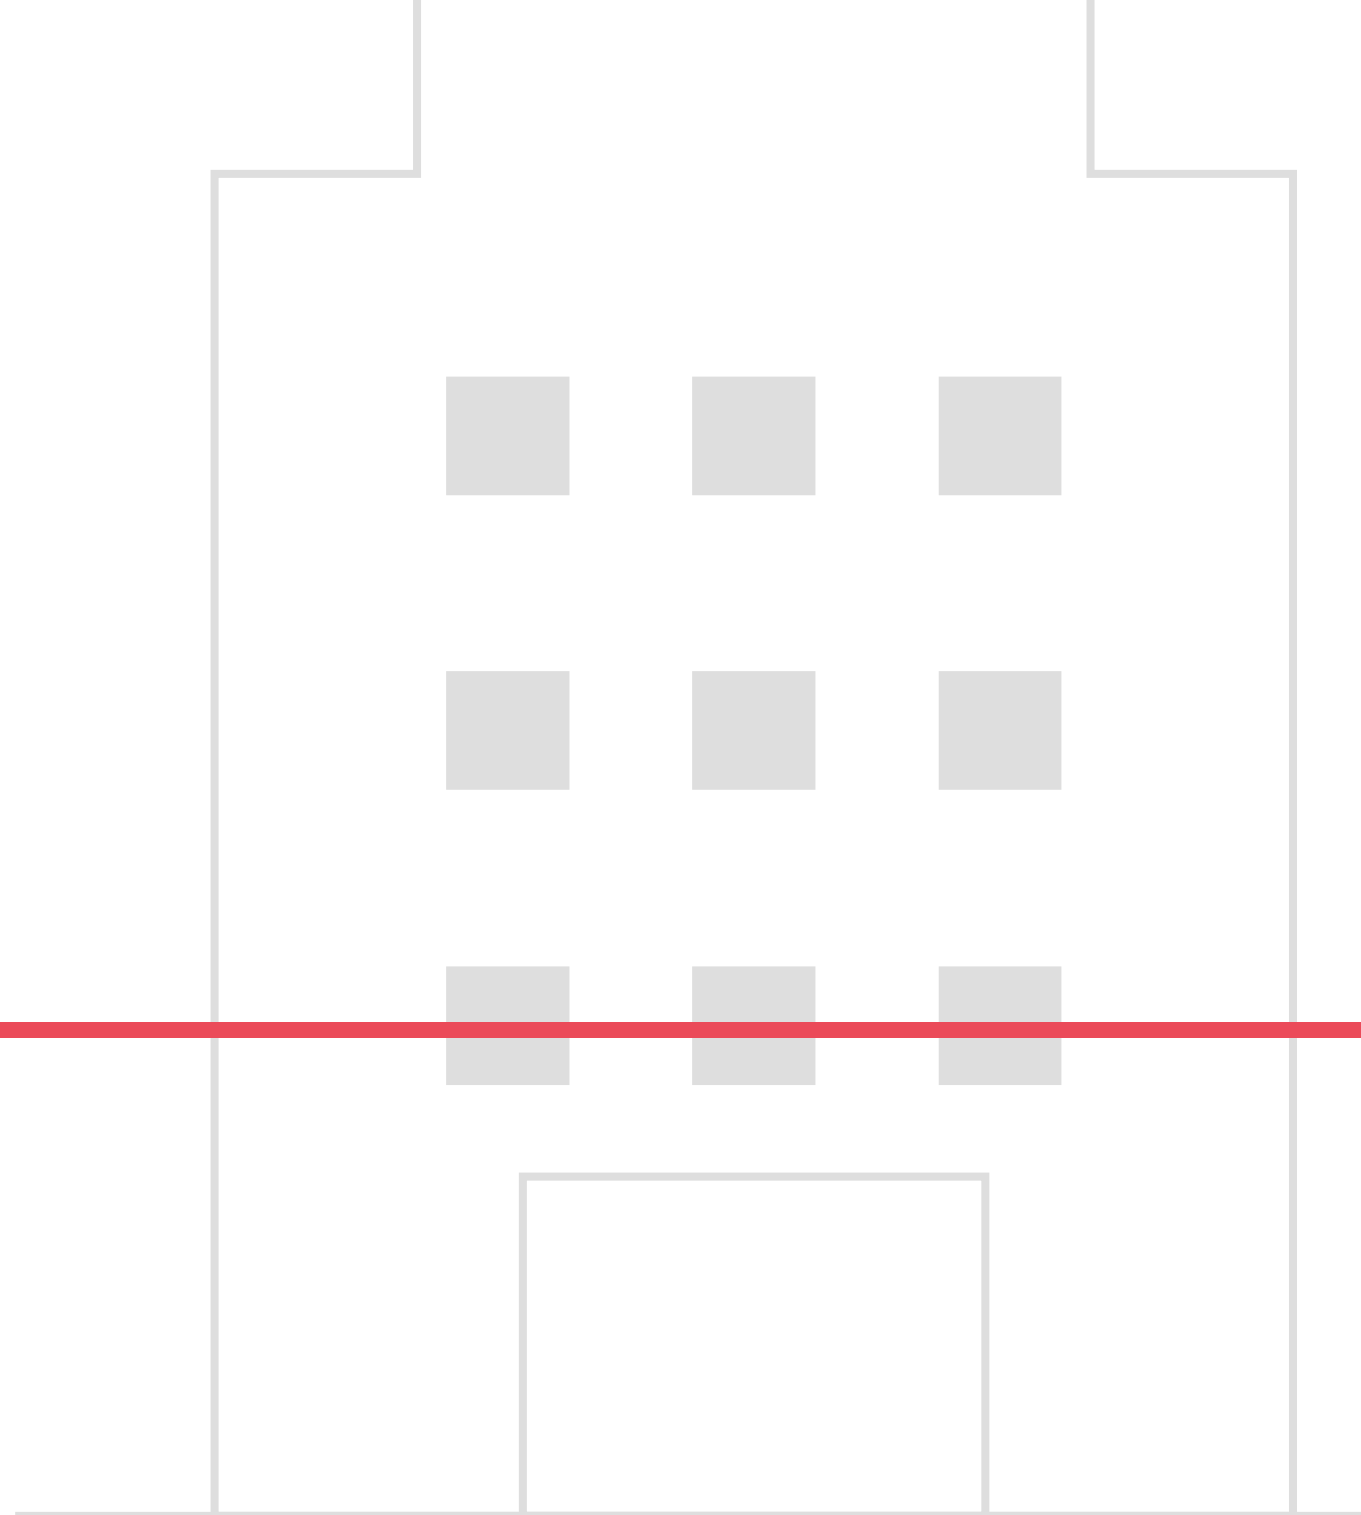

URBAN DESIGN

LIVE, WORK & PLAY

From town centre appraisals to conceptual plans for landowners, we lead urban design projects that redefine public and private spaces. Our team collaborates closely with clients to manage every stage of the process, from vision to implementation.

HERITAGE

RESPECTING THE PAST

We specialize in the sensitive restoration and adaptive reuse of heritage buildings. Whether it's preserving a facade, archway, or architectural detail, we aim to retain original character while enhancing function.

We guide councils, developers, and homeowners through complex planning processes and are always up for a conservation conversation.

PICCADILLY ARCADE / BIRMINGHAM

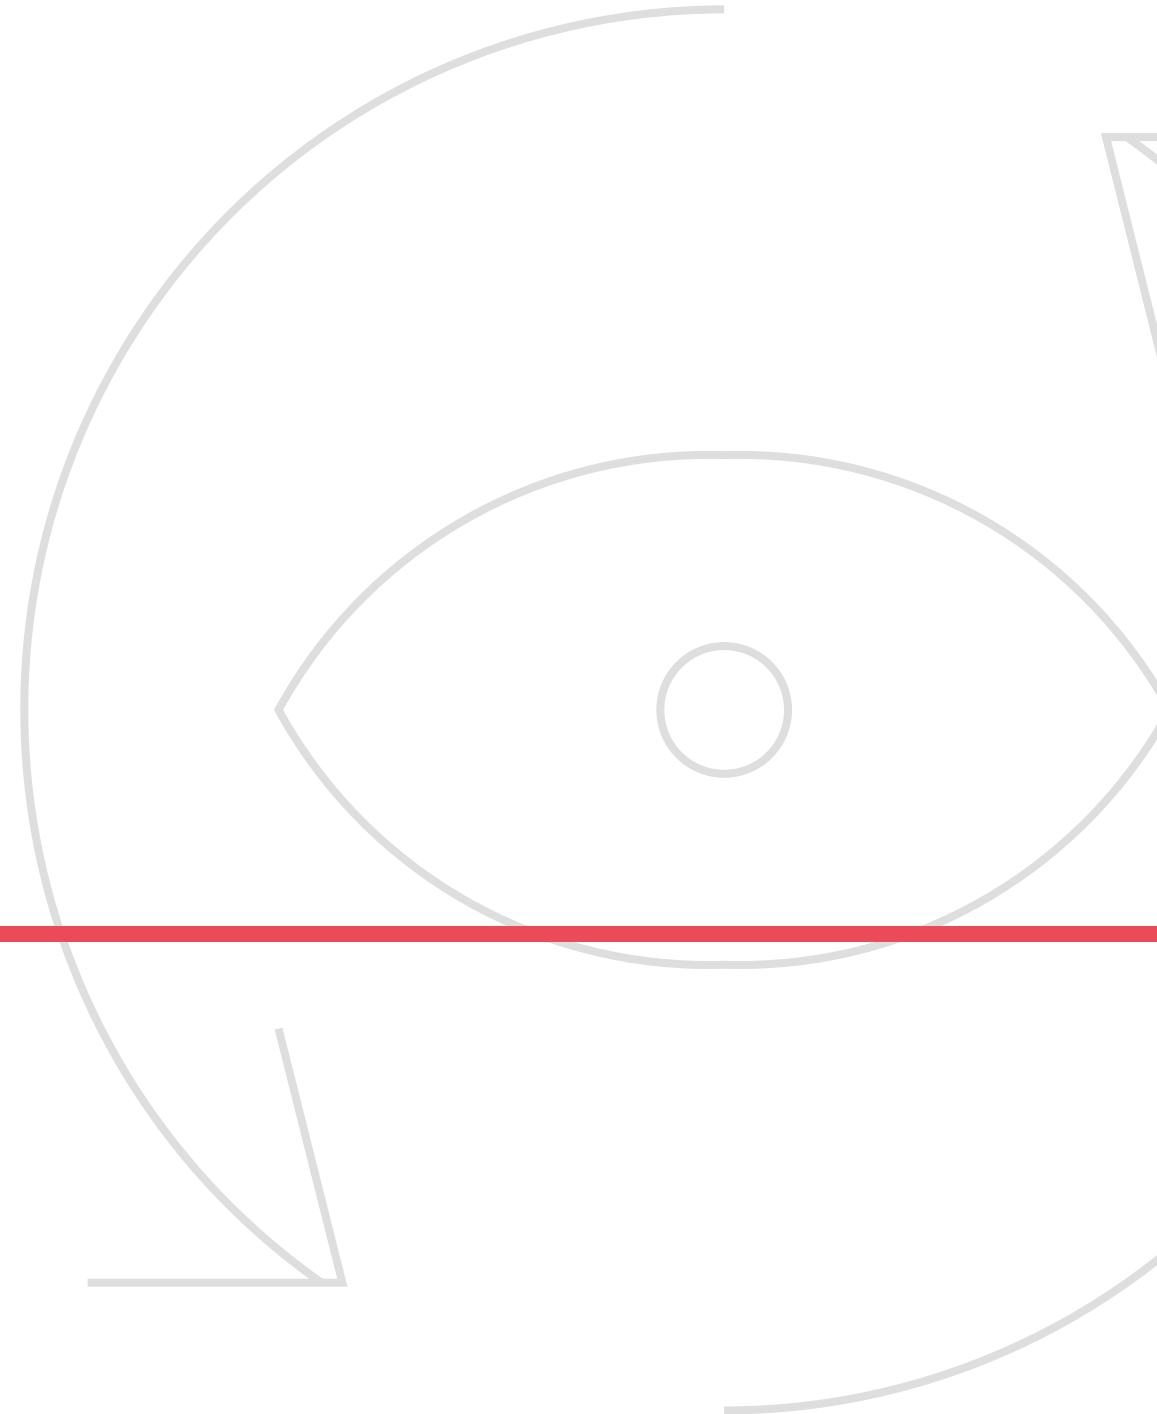

REFURBISHMENT

REINVENTING SPACES

Refurbishment is more than a fresh coat of paint. We approach it as creative reinvention—listening carefully to your goals and unlocking the full potential of your property.

Whether you're updating a facade, opening up space, or enhancing natural light, our solutions are thoughtful, practical, and designed for long-term impact.

We seek to continually evolve and grow —
developing new design approaches and
techniques for every project.

Nick — Director

SHAPING

FUTURES

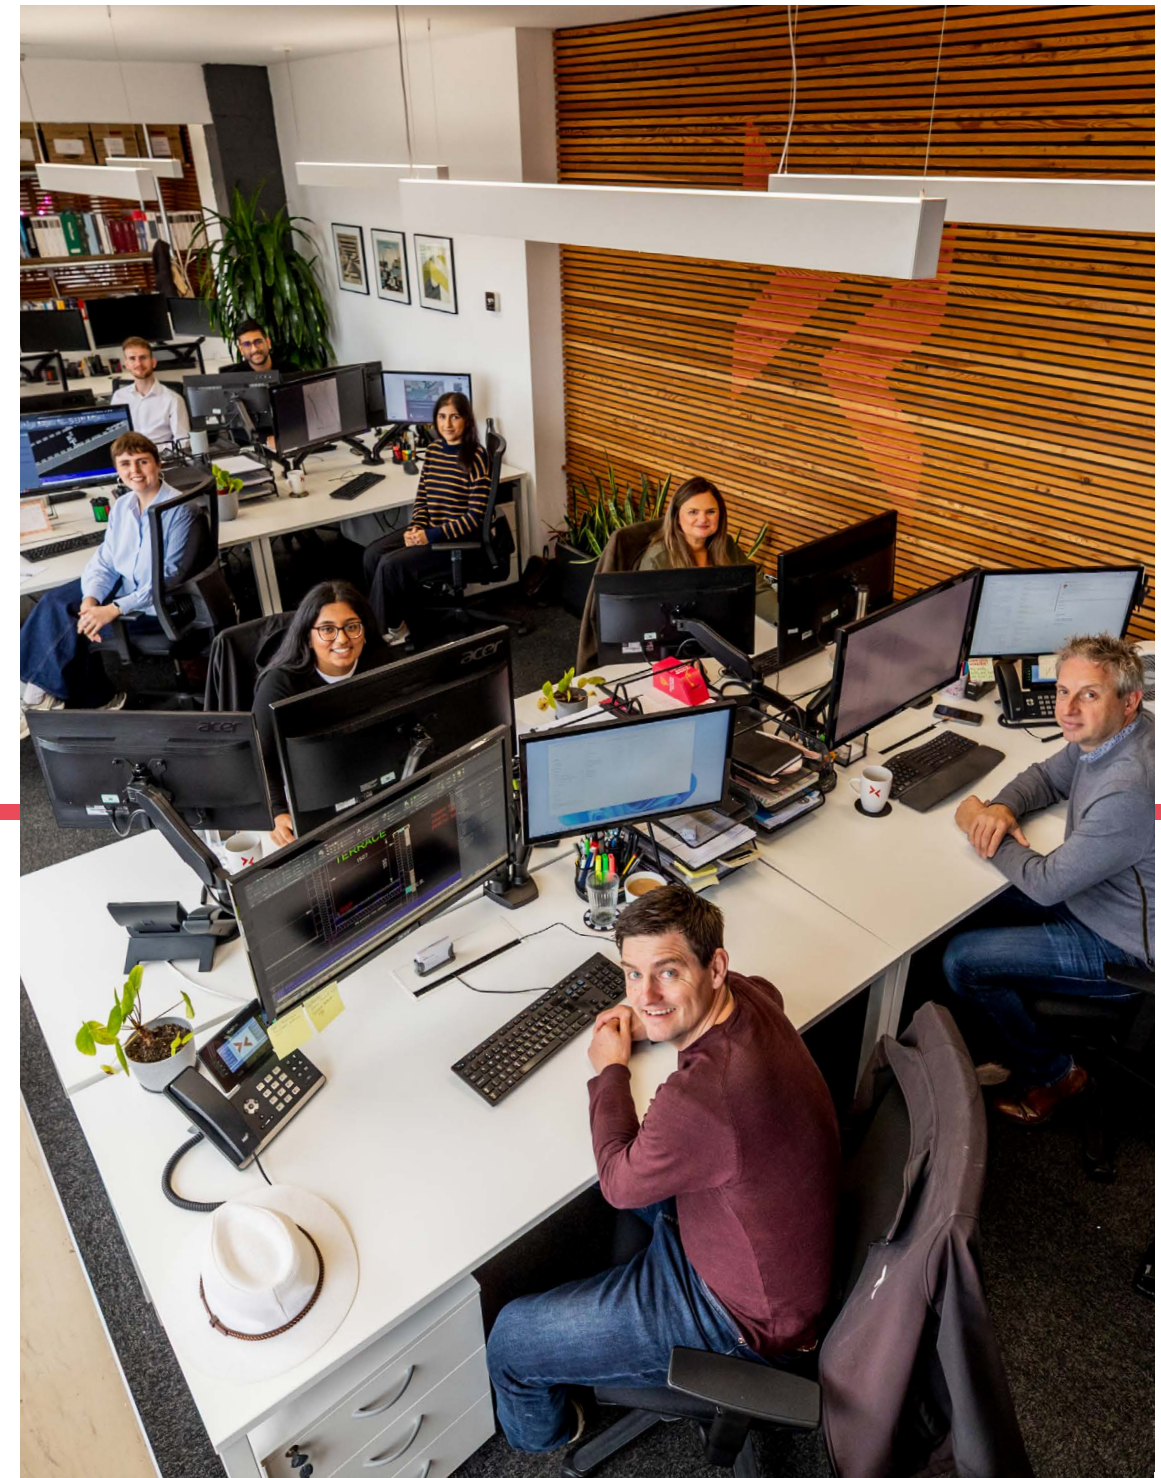

THE ALIGN TEAM

Align Architecture was established in 2014, bringing together a comprehensive range of services and a diverse skill set to support both public and private sector clients across multiple sectors.

With more than 25 years of industry experience, our team places the client at the centre of every project. We listen carefully, prepare thoughtfully,

and deliver solutions that align with each client's aspirations, budget, and timescales, building strong and lasting relationships along the way.

Our team is committed to continuous development, expanding their skills and exploring new design approaches and techniques to enhance the value and impact of every project we undertake.
